Minimum Duration of the Course	360 Hours
Maximum Duration of the Course	360 Hours

Program Overview

This section summarises the end objectives of the program along with its duration.

Training Outcomes

At the end of the program, the learner should have acquired the listed knowledge and skills to:

- Describe the process of using the relevant tools and equipment for shuttering carpentry.
- Describe the process of assisting in making wooden shutters boards and joints.
- Describe the process of assisting in assembling and dismantling conventional and system formwork for RCC structures.
- Elucidate ways to erect and dismantle temporary scaffold up to 3.6 meter height
- Explain the importance of working effectively in a team to deliver desired results at the workplace.
- Elucidate ways to work according to personal health, safety and environment protocols at construction site.

Compulsory Modules

The table lists the modules and their duration corresponding to the Compulsory NOS of the QP.

NOS and Module Details	Theory Duration	Practical Duration	On-the-Job Training Duration (Mandatory)	On-the-Job Training Duration (Recommended)	Total Duration
CON/N0312: Use the relevant tools and equipment for shuttering carpentry NOS Version- 4.0 NSQF Level- 3.0	15:00	15:00	30:00	00:00	60:00
Module 1: Introduction to the role of a Assistant Shuttering Carpenter	05:00	00:00	00:00	00:00	05:00
Module 2: Process of using the relevant tools and equipment for shuttering carpentry	10:00	15:00	30:00	00:00	55:00
CON/N0313: Assist in making wooden shutters boards and joints NOS Version- 4.0	35:00	25:00	00:00	00:00	60:00

NSQF Level- 3					
Module 3: Process of assisting in making wooden shutters boards and joints	35:00	25:00	00:00	00:00	60:00
CON/N0314: Assist in assembling and dismantling conventional and system formwork for RCC structures NOS Version- 4.0	45:00	45:00	00:00	00:00	90:00
NSQF Level- 3					
Module 5: Process of assisting in assembling and dismantling conventional and system formwork for RCC structures	45:00	45:00	00:00	00:00	90:00
CON/N0101: Erect and dismantle temporary scaffold up to 3.6 - meter height NOS Version- 7.0	15:00	45:00	00:00	00:00	60:00
NSQF Level- 3					
Module 6: Process of erecting and dismantling temporary scaffold up to 3.6 meter height	15:00	45:00	00:00	00:00	60:00
CON/N8001: Work effectively in a team to deliver desired results at the workplace NOS Version- 12.0 NSQF Level- 4	05:00	25:00	00:00	00:00	30:00
Module 7: Work effectively in a team to deliver desired results at the workplace	05:00	25:00	00:00	00:00	30:00
CON/N9001: Work according to personal health, safety and environment protocols at construction site NOS Version- 10.0 NSQF Level- 4	05:00	25:00	00:00	00:00	30:00
Module 8 : Follow safety norms as defined by organization, adopt healthy and safe work practices	05:00	25:00	00:00	00:00	30:00

DGT/VSQ/N0101: Employability Skills NOS Version- 1.0 NSQF Level- 2	30:00	00:00	00:00	00:00	30:00
Module 9: Employability Skills	30:00	00:00	00:00	00:00	30:00
Total Duration	150:00	180:00	30:00	00:00	360:00

Module Details

Module 1: Introduction to the role of an Assistant Shuttering Carpenter Mapped to CON/N0312 v4.0

Terminal Outcomes:

• Discuss the job role of an Assistant Shuttering Carpenter.

Duration: 05:00	Duration: 0:00
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
 Describe the size and scope of the Construction industry and its sub- sectors. 	
 Discuss the role and responsibilities of an Assistant Shuttering Carpenter. 	
 Identify various employment opportunities for an Assistant Shuttering Carpenter. 	
Classroom Aids	
Training Kit - Trainer Guide, Presentations, White	board, Marker, Projector, Laptop, Video Films
Tools, Equipment and Other Requirements	
NA	

Module 2: Process of using the relevant tools and equipment for shuttering carpentry Mapped to CON/N0312 v4.0

Terminal Outcomes:

Describe the process of using the tools, equipment, components, and materials.

Duration: 10:00	Duration: 15:00
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
 Explain the use of relevant manual and power tools and equipment, such as claw hammer, hand saw, hack saw wooden planners, measuring tape, nailing hammer, try square, plumb bob and other relevant tools. 	 Demonstrate how to use the appropriate hand and power tools, such as claw hammer, hand saw, hack saw wooden planners, measuring tape, nailing hammer, try square, plumb bob, drilling machine, power saw, etc.
 Describe the safe working methods and movements while performing relevant tasks. 	 Show how to use materials such as timbers, plywood, runner pieces of different size, wooden battens for
 Explain the types and use of slings, shackles and lifting belts. 	shuttering work.
 Describe the process of stacking of various shuttering carpentry and scaffolding materials. 	 Demonstrate the process of setting up and using bamboos and ballis, props, acrow span, H-beam, shuttering sheets, foot plates, U head
 State the safe height for stacking shuttering carpentry and scaffolding materials. 	and other relevant components for shuttering works.
 List different types of hand and power tools used for cutting and planing of timber. 	 Demonstrate the process of carrying out regular maintenance of tools and equipment, e.g. cleaning, oiling, minor repairs.
 State the relevant components and their standard sizes. 	 Demonstrate the use of personal protective gears, such as safety
 Describe the safe procedures for manual and mechanical material handling. 	shoes, gloves, helmets, ear plugs, safety goggles, and half body safety harness.
 Describe the standard housekeeping procedure. 	
Explain how to work safely at heights.	

Classroom Aids

Training Kit (Trainer Guide, Presentations). Whiteboard, Marker, Projector, Laptop

Tools, Equipment and Other Requirements

Claw Hammer, Ball Pin Hammer, Handsaw, Tenon Saw, Wooden Jack Planner, Iron Jack Planner, Wooden Marking Gauge, Wooden Mortise Gauge, Auger, Farmer Chisel, Mortise Chisel, Cutting Player, Screw Driver, Star Screw Driver, Marking Knife / Scribe, Wooden Mallet, Oil Stone (Rough / Smooth), Cutting Chisel, Center Punch, Bench Vice, Hacksaw Frame With Blade, Triangle File, Drill

Bit, Ring Spanner, Double End Spanner, Flat File, Half Round File, Hand Held Circular Saw, Hand Held Zig Saw, Hand Drill Machine, Table Mounted Saw, Planing Machine, Power Drilling Machine, Masking Tape, Nylon Line Thread, Nails, Spirit Level, Steel Measuring Tape, Plumb Bob, Water Level Tube, Hammer, Spanner (Set), Wrench, Pulley, Rope, Nuts and Bolts, Mason's Line, Tri-Square, Safety Shoes, Safety Goggles, Safety Helmet, Cotton Hand – Gloves, Tools Bag, Safety Belt, Face Mask, Operator – Leather Apron, Ear Muff, Reflective Jackets, Safety Message Boards, Fire Extinguishers, Sand Buckets.

Module 3: Process of assisting in making wooden shutters boards and joints *Mapped to CON/N0313 v4.0*

Terminal Outcomes:

• Elucidate ways to cut, plane and drill timber and plywood equipment and make timber joints.

Duration: 35:00	Duration: 25:00
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
	 Show how to use circular saw blade for cutting wood based on the thickness and type of wood. Show how to measure and mark timber/ plywood using appropriate measurement and marking tools. Demonstrate how to use handheld power saw for cutting and sizing timber and plywood. Show how to cut timber and plywood of different types and thickness using table mounted saw, safely feeding timber/ plywood to the machine. Demonstrate how to drill holes of different diameter in timber and plywood using power drilling machine, as instructed by the supervisor. Demonstrate how to create timber joint such as lap joint, mortis and tenon joints, dovetail joints and
waterproof, marine plywood, etc.	Demonstrate ways to assist in making house a particular in the property of the proper
 Explain the use of different hand and power tools for cutting and planing timber. 	shutter boards as per instructions.
 Elucidate the handling, repair and maintenance requirements of relevant tools. 	
 Explain the use of measurement and marking tools. 	
• List different types of timber joints.	
 Explain the use of different types of file. 	
 List different types of cutting blade, 	

size and cutting depth.

- State the appropriate electrical safety measures for the use of power tools
- Explain how to make line, sketch and label.

Classroom Aids

Training Kit (Trainer Guide, Presentations). Whiteboard, Marker, Projector, Laptop

Tools, Equipment and Other Requirements

Claw Hammer, Ball Pin Hammer, Handsaw, Tenon Saw, Wooden Jack Planner, Iron Jack Planner, Wooden Marking Gauge, Wooden Mortise Gauge, Auger, Farmer Chisel, Mortise Chisel, Cutting Player, Screw Driver, Star Screw Driver, Marking Knife / Scribe, Wooden Mallet, Oil Stone (Rough / Smooth), Cutting Chisel, Center Punch, Bench Vice, Hacksaw Frame With Blade, Triangle File, Drill Bit, Ring Spanner, Double End Spanner, Flat File, Half Round File, Hand Held Circular Saw, Hand Held Zig Saw, Hand Drill Machine, Table Mounted Saw, Planing Machine, Power Drilling Machine, Masking Tape, Nylon Line Thread, Nails, Spirit Level, Steel Measuring Tape, Plumb Bob, Water Level Tube, Hammer, Spanner (Set), Wrench, Pulley, Rope, Nuts and Bolts, Mason's Line, Tri-Square, Safety Shoes, Safety Goggles, Safety Helmet, Cotton Hand – Gloves, Tools Bag, Safety Belt, Face Mask, Operator – Leather Apron, Ear Muff, Reflective Jackets, Safety Message Boards, Fire Extinguishers, Sand Buckets.

Module 4: Process of assisting in assembling and dismantling conventional and system formwork for RCC structures

Mapped to CON/N0314 v4.0

Terminal Outcomes:

- Describe the process of performing the preparatory activities.
- Elucidate ways to assemble and dismantle conventional formwork and system formwork.

Duration: 45:00	Duration: 45:00
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
 State the units of measurements. Explain the use of relevant measurements and marking tools. Explain the use of relevant hand tools for shuttering work. State the standard size of relevant hand tools and components. Explain the use of water level tube, spirit level, plumb bob, and trisquare. Elucidate how to provide support in shuttering works. Explain different types of tying ropes. Explain the use of materials, components and equipment for conventional and system formwork. 	 Demonstrate how to shift and stack the required quantity of materials and components at the work site as per the instructions. Demonstrate ways to assist in marking, cutting and sizing timber for making shutter boards. Demonstrate the process of carrying out nailing to make shutter boards as per instructions. Demonstrate ways to assist in erecting staging for shuttering using conventional formwork. Show how to tie different types of knots for shuttering as instructed and work requirements. Demonstrate ways to assist in
 Explain the use of different types of hand and power tools for cutting and planing timber. Describe the standard procedure for assembling and dismantling conventional and system formwork. Describe the standard health and safety procedure. 	 assembling and fixing aluminum and steel formwork as per instructions. Demonstrate the process of assisting in erecting staging for shuttering using system formwork. Demonstrate the process of assisting in removing shutter boards and dismantling system formwork safely under supervision.

Classroom Aids

Training Kit - Trainer Guide, Presentations, Whiteboard, Marker, Projector, Laptop, Video Films

Tools, Equipment and Other Requirements

Claw Hammer, Ball Pin Hammer, Handsaw, Tenon Saw, Wooden Jack Planner, Iron Jack Planner, Wooden Marking Gauge, Wooden Mortise Gauge, Auger, Farmer Chisel, Mortise Chisel, Cutting Player, Screw Driver, Star Screw Driver, Marking Knife / Scribe, Wooden Mallet, Oil Stone (Rough / Smooth), Cutting Chisel, Center Punch, Bench Vice, Hacksaw Frame With Blade, Triangle File, Drill Bit, Ring Spanner, Double End Spanner, Flat File, Half Round File, Hand Held Circular Saw, Hand Held Zig Saw, Hand Drill Machine, Table Mounted Saw, Planing Machine, Power Drilling Machine,

Masking Tape, Nylon Line Thread, Nails, Spirit Level, Steel Measuring Tape, Plumb Bob, Water Level Tube, Hammer, Spanner (Set), Wrench, Pulley, Rope, Nuts and Bolts, Mason's Line, Tri-Square, Safety Shoes, Safety Goggles, Safety Helmet, Cotton Hand – Gloves, Tools Bag, Safety Belt, Face Mask, Operator – Leather Apron, Ear Muff, Reflective Jackets, Safety Message Boards, Fire Extinguishers, Sand Buckets.

Module 5: Process of erecting and dismantling temporary scaffold up to 3.6-meter height

Mapped to CON/N0101 v7.0

Terminal Outcomes:

• Explain the process of erecting and dismantling temporary scaffold.

Duration: 15:00	Duration: 45:00
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
 Explain the use of different types of scaffolds (e.g. cup-lock, frame scaffold). 	 Demonstrate the process of carrying out levelling in the area where scaffold needs to be erected and check for ground compactness.
 Explain the use of tools and tackles in scaffolding, including tools for erecting and dismantling 3.6 meter temporary scaffold. Elucidate the identification and use of 	 Demonstrate how to use appropriate components and follow the standard procedure for erecting temporary scaffold up to 3.6 m in height.
different scaffolding components. • List the standard size of scaffolding components.	 Demonstrate the process of setting up walk-boards, guard rails, toe- boards and other components on the scaffold's working platform.
 Describe the standard procedure for erecting and dismantling 3.6 m temporary scaffold. 	Show how to clean and stack all components properly after dismantling.
Classroom Aids	1

Classroom Aids

Training Kit - Trainer Guide, Presentations, Whiteboard, Marker, Projector, Laptop, Video Films

Tools, Equipment and Other Requirements

Claw Hammer, Ball Pin Hammer, Handsaw, Tenon Saw, Wooden Jack Planner, Iron Jack Planner, Wooden Marking Gauge, Wooden Mortise Gauge, Auger, Farmer Chisel, Mortise Chisel, Cutting Player, Screw Driver, Star Screw Driver, Marking Knife / Scribe, Wooden Mallet, Oil Stone (Rough / Smooth), Cutting Chisel, Center Punch, Bench Vice, Hacksaw Frame With Blade, Triangle File, Drill Bit, Ring Spanner, Double End Spanner, Flat File, Half Round File, Hand Held Circular Saw, Hand Held Zig Saw, Hand Drill Machine, Table Mounted Saw, Planing Machine, Power Drilling Machine, Masking Tape, Nylon Line Thread, Nails, Spirit Level, Steel Measuring Tape, Plumb Bob, Water Level Tube, Hammer, Spanner (Set), Wrench, Pulley, Rope, Nuts and Bolts, Mason's Line, Tri-Square, Safety Shoes, Safety Goggles, Safety Helmet, Cotton Hand – Gloves, Tools Bag, Safety Belt, Face Mask, Operator – Leather Apron, Ear Muff, Reflective Jackets, Safety Message Boards, Fire Extinguishers, Sand Buckets.

Module 6: Work effectively in a team to deliver desired results at the workplace

Mapped to CON/N8001 v12.0

Terminal Outcomes:

- Explain the importance of interacting and communicating in an effective manner.
- Elucidate ways to support co-workers to execute the project requirements.
- Elucidate ways to practice inclusion at workplace.

Duration: 05:00	Duration: 25:00
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
 Elucidate own roles and responsibilities. Explain the importance of effective communication. Elucidate the consequence of poor teamwork on project outcomes, timelines, safety at the construction site, etc. Explain different modes of communication used at workplace. Explain the importance of creating healthy and cooperative work environment among the gangs of workers. Elucidate applicable techniques of work, properties of materials used, tools and tackles used, safety standards that co-workers might need as per the requirement. Explain the importance of proper and effective communication and the expected adverse effects in case of failure relating to quality, timeliness, safety, risks at the construction project site. Explain the importance and need of supporting co-workers facing problems for the smooth functioning of work. Discuss the fundamental concept of gender equality. Explain how to recognise and be sensitive to issues of disability, culture and gender. 	 Demonstrate how to pass on work related information/ requirement clearly to the team members. Show how to report any unresolved problem to the supervisor immediately. Demonstrate ways to hand over the required material, tools, tackles, equipment and work fronts timely to interfacing teams. Demonstrate ways to work together with co-workers in a synchronized manner. Demonstrate effective implementation of gender neutral practices at workplace. Demonstrate ways to address discriminatory and offensive behaviour in a professional manner as per organizational policy.

 Discuss legislation, policies, and procedures relating to gender sensitivity and cultural diversity including their impact on the area of operation.

Classroom Aids

Training Kit - Trainer Guide, Presentations, Whiteboard, Marker, Projector, Laptop, Video Films

Tools, Equipment and Other Requirements

NA

Module 7: Work according to personal health, safety and environment protocols at construction site

Mapped to NOS CON/N9001 v10.0

Terminal Outcomes:

- Explain the importance of following safety norms as defined by organization.
- Explain the need to adopt healthy & safe work practices.
- Describe the process of implementing good housekeeping and environment protection process and activities.
- Explain the importance of following infection control guidelines as per applicability.

Duration: 05:00	Duration: 25:00			
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes			
 Describe the reporting procedures in cases of breaches or hazards for site safety, accidents, and emergency situations as per guidelines. 	 Demonstrate how to follow emergency and evacuation procedures in case of accidents, fires, or natural calamities. 			
 Explain different types of safety hazards at construction sites. Discuss basic ergonomic principles as per applicability. 	 Show how to operate different types of fire extinguishers corresponding to various types of fires as per EHS guidelines. 			
 Describe the procedure for responding to accidents and other emergencies at site. 	 Demonstrate the use of appropriate Personal Protective Equipment (PPE) as per work requirements for Head Protection, Ear Protection, Fall 			
 Explain the importance of handling tools, equipment, and materials as per applicable norms. 	Protection, Ear Protection, Fair Protection, Foot Protection, Face and Eye Protection, Hand and Body Protection, and Respiratory Protection (if required). • Demonstrate how to check and install all safety equipment as per standard guidelines.			
 Explain the effect of construction material on health and environments as per applicability. Describe various environmental protection methods as per applicability. Explain the storage requirement of waste including non-combustible scrap material and debris, combustible scrap material and debris, general construction waste and trash (non-toxic, non-hazardous), any other hazardous wastes and any other flammable wastes at the appropriate location. 				
	 Show how to collect, segregate and deposit construction waste into appropriate containers based on 			
	 Show how to clean and disinfect all materials, tools and supplies before and after use. 			
 Explain how to use hazardous material in a safe and appropriate manner as per applicability. 				

- Explain types of fire.
- Describe the procedure of operating different types of fire extinguishers.
- State safety relevant to tools, tackles, and equipment as per applicability.
- List housekeeping activities relevant to task.
- Elucidate ways of transmission of infection
- Elucidate ways to manage infectious risks at the workplace.
- Describe different methods of cleaning, disinfection, sterilization, and sanitization.
- List the symptoms of infection like fever, cough, redness, swelling, and inflammation.

Classroom Aids:

Black/White board, marker, Projector/LED Monitor, Computer, Trade specific charts, Safety tags, Safety Notice board, registers and other teaching aids

Tools, Equipment and Other Requirements

Leather Hand Gloves, Jump suit, Wire brush, Hand and Leg guard leather, Safety goggles, Nose mask, Ear protection, Fire extinguishers, Sand buckets Flashback arrestors, Welding helmet, Welding glass, Fire Extinguisher, Fire prevention kit, First Aid box, Safety tags, Safety Notice board

Module 8: Employability Skills Mapped to NOS DGT/VSQ/N0101 v1.0

Duration: 30:00

Key Learning Outcomes

Introduction to Employability Skills Duration: 1 Hour

After completing this programme, participants will be able to:

1. Discuss the importance of Employability Skills in meeting the job requirements

Constitutional values - Citizenship Duration: 1 Hour

- 2. Explain constitutional values, civic rights, duties, citizenship, responsibility towards society etc. that are required to be followed to become a responsible citizen.
- 3. Show how to practice different environmentally sustainable practices

Becoming a Professional in the 21st Century Duration: 1 Hours

- 4. Discuss 21st century skills.
- 5. Display positive attitude, self -motivation, problem solving, time management skills and continuous learning mindset in different situations.

Basic English Skills Duration: 2 Hours

6. Use appropriate basic English sentences/phrases while speaking

Communication Skills Duration: 4 Hour

- 7. Demonstrate how to communicate in a well -mannered way with others.
- 8. Demonstrate working with others in a team

Diversity & Inclusion Duration: 1 Hour

- 9. Show how to conduct oneself appropriately with all genders and PwD
- 10. Discuss the significance of reporting sexual harassment issues in time

Financial and Legal Literacy Duration: 4 Hours

- 11. Discuss the significance of using financial products and services safely and securely.
- 12. Explain the importance of managing expenses, income, and savings.
- 13. Explain the significance of approaching the concerned authorities in time for any exploitation as per legal rights and laws

Essential Digital Skills Duration: 3 Hours

- 14. Show how to operate digital devices and use the associated applications and features, safely and securely
- 15. Discuss the significance of using internet for browsing, accessing social media platforms, safely and securely

Entrepreneurship Duration: 7 Hours

16. Discuss the need for identifying opportunities for potential business, sources for arranging money and potential legal and financial challenges

Customer Service Duration: 4 Hours

- 17. Differentiate between types of customers
- 18. Explain the significance of identifying customer needs and addressing them
- 19. Discuss the significance of maintaining hygiene and dressing appropriately

Getting ready for apprenticeship & Jobs Duration: 2 Hours

- 20. Create a biodata
- 21. Use various sources to search and apply for jobs
- 22. Discuss the significance of dressing up neatly and maintaining hygiene for an interview
- 23. Discuss how to search and register for apprenticeship opportunities

Module 9: On-the-Job Training Mapped to Assistant Shuttering Carpenter

Mandatory Duration: 30:00 Recommended Duration: 00:00

Location: On-Site

Terminal Outcomes

• Explain the types and use of slings, shackles and lifting belts.

- Use the appropriate hand and power tools, such as claw hammer, hand saw, hack saw wooden planners, measuring tape, nailing hammer, try square, plumb bob, drilling machine, power saw, etc.
- Set up and use bamboos and ballis, props, acrow span, H-beam, shuttering sheets, foot plates, U head and other relevant components for shuttering works.
- Measure and mark timber/ plywood using appropriate measurement and marking tools.
- Use handheld power saw for cutting and sizing timber and plywood.
- Carry out nailing to make shutter boards as per instructions.
- Assist in erecting staging for shuttering using system formwork.
- Create timber joint such as lap joint, mortis and tenon joints, dovetail joints and housing joints using appropriate hand tools.
- Carry out levelling in the area where scaffold needs to be erected and check for ground compactness.
- Operate different types of fire extinguishers corresponding to various types of fires as per EHS guidelines.

Annexure

Trainer Requirements

Trainer Prerequisites						
Minimum Educational	Specialisation	Relevant Industry Tra Experience		Traini	ng Experience	Remarks
Qualification	Qualification		Specialization	Years	Specialization	
B. Tech	Civil/Mechanic al/ Electrical	1	Shuttering Carpentry	0	-	
Diploma	Civil/Mechanic al/ Electrical	2	Shuttering Carpentry	0	-	
ІТІ	Civil/Mechanic al/ Electrical	4	Shuttering Carpentry	0	-	
General BA/BSc./EX- Army/ 12th	Civil/Mechanic al/ Electrical	4	Shuttering Carpentry	0	-	

Trainer Certification				
Domain Certification	Platform Certification			
Certified for Job Role "Assistant Shuttering Carpenter", mapped to QP: "CON/Q0302, v3.0", Minimum accepted score is 80%	Recommended that the Trainer is certified for the Job Role: "Trainer (Vet and Skills)", mapped to the Qualification Pack: "MEP/Q2601, v2.0". The minimum accepted score as per MEPSC guidelines is 80%.			

Assessor Requirements

Assessor Prerequisites						
Minimum Educational	Specialization	Relevant Industry Experience		Training/Assessment Experience		Remarks
Qualification		Years	Specialization	Years	Specialization	
B. Tech	Civil/Mechanical/ Electrical	2	Shuttering Carpentry	0	-	
Diploma	Civil/Mechanical/ Electrical	4	Shuttering Carpentry	0	-	
ITI	Civil/Mechanical/ Electrical	5	Shuttering Carpentry	0	-	

Assessor Certification				
Domain Certification	Platform Certification			
Certified for Job Role "Assistant Shuttering Carpenter", mapped to QP: "CON/Q0302 v3.0", Minimum accepted score is 80%	Recommended that the Assessor is certified for the Job Role: "Assessor (VET and skills)", mapped to the Qualification Pack: "MEP/Q2701, v2.0". The minimum accepted score is 80%.			

Assessment Strategy

This section includes the processes involved in identifying, gathering, and interpreting information to evaluate the Candidate on the required competencies of the program.

1. Assessment System Overview:

- Batches assigned to the assessment agencies for conducting the assessment on SIP
- The batch allocation Matrix prepared for each month based on previous months' performance of AAs, which determines the quantum of Assessment which can be allocated to each AA for a month
- Post allocation of assessment, Assessment agencies send the assessment confirmation to SSC
- Assessment agency deploys the ToA certified Assessor for executing the assessment
- SSC monitors the assessment process.

2. Testing Environment:

- A combination of Theory and practical/demonstration test is deployed to assess knowledge and Skill respectively of Learners.
- Assessment is conducted at Training center in in-person/offline mode
- For Skill assessment, environment is simulated to create a realistic Working Environment that should replicate the key features of the workplace. In job roles, where it is difficult to replicate the same, the OJT assessment is implemented.
- During the practical task, trainees are assessed on their workmanship, quality of finished product, time management, etc., based on the performance criteria (PC), knowledge and understanding and their professional and soft skills as specified in the qualification pack.
- Knowledge assessment is done through closed ended questions up to level 4 and from level 5 onwards, it is mixture of open ended and closed ended questions

3. Assessment Quality Assurance levels/Framework

- Assessment criteria is developed for each QP which acts as a guide for developing question set /banks
- Sample questions aligned with Assessment criteria for each QP are developed by SSC and validated by industry
- Taking reference of Assessment criteria and Sample Questions, AAs create the question bank which is further validated by SSC
- Questions are mapped to the specified assessment criteria
- It is mandatory that Assessor and Trainer must be ToA certified & ToT Certified respectively
- Continuous Monitoring through virtual and In-person mode are conducted to ensure the assessment is conducted as per stipulated process
- Process and Technical audit of assessment batches by quality team are conducted to avoid the errors in assessment process

- A well -defined comprehensive framework of NON-COMPLIANCE MATRIX is defined and implemented to identify the non-compliance made by assessor and AA and punitive actions are taken correspondingly.
- The capacity building sessions are conducted regularly for assessors and assessment agencies to update them about best practices in assessment

4. Types of evidence or evidence-gathering protocol:

- Post Assessment, the evidences are uploaded by Assessor to assessment agency and further assessment agency to SSC as per stipulated TAT
- Evidences are broadly the photographic and video graphic in nature
- Assessment agencies upload the evidence on SIP and detailed evidence on SSC digital platform (ZoHO)
- Evidences are; NOS wise-Geotagged photographs and videos of Theory Test & Practical Tasks, Attendance sheet, result summary sheet, group photographs.

5. Method of verification or validation:

- The process and technical audit of assessment batches are done by SSC
- Attendance of each candidate is verified and it is ensured that only those candidates are assessed by assessors who are meeting the stipulated minimum percentage of attendance
- The result of each candidate is verified, it is verified that that result on SIP are matching with respect to summary sheet submitted by AAs
- Under detailed technical audit for sample of batches, the knowledge and skill assessment results for each candidate is checked in technical aspect.
- All the evidences of batches are preserved on server of SSC digital platform

On the Job:

 On job training (OJT), candidates undergo training and leaning at actual workplace for a fixed period of time and a certain weightage of assessment is allocated out of total skill weightage of Qualification Pack for undergoing OJT as stipulated by CSDCI. This OJT score and assessors' end point score are combined to arrive at final Marking/grading of trainees' skill test. The OJT score is determined by Supervisor of company under which candidates undergo on job training.

Glossary

Term	Description
Declarative Knowledge	Declarative knowledge refers to facts, concepts and principles that need to be known and/or understood in order to accomplish a task or to solve a problem.
Key Learning Outcome	Key learning outcome is the statement of what a learner needs to know, understand and be able to do in order to achieve the terminal outcomes. A set of key learning outcomes will make up the training outcomes. Training outcome is specified in terms of knowledge, understanding (theory) and skills (practical application).
OJT (M)	On-the-job training (Mandatory); trainees are mandated to complete specified hours of training on site
OJT (R)	On-the-job training (Recommended); trainees are recommended the specified hours of training on site
Procedural Knowledge	Procedural knowledge addresses how to do something, or how to perform a task. It is the ability to work, or produce a tangible work output by applying cognitive, affective or psychomotor skills.
Training Outcome	Training outcome is a statement of what a learner will know, understand and be able to do it upon the completion of the training.
Terminal Outcome	Terminal outcome is a statement of what a learner will know, understand and be able to do upon the completion of a module. A set of terminal outcomes help to achieve the training outcome.
